

## RW RSK Kits

### Standard Body Features

- Tubular steel chassis patterned after the original car
- Designed to accept VW Type 1 engine and transaxle
- Front suspension, integrated into chassis: torque arm double beam – renewed ball joint type, ride-height adjustable with standard spindles
- Rear suspension integrated into chassis: RSK design specific torque tube with adjustable ride-height spring plates
- Lightweight glass fiber body integrated to chassis
- Three gauge dash cluster
- Choice of single or double headrest integrated into rear deck lid

### Design Features

**Body:** Hand lay-up fiberglass/polyester resin composite structure.

**Chassis:** Hand-fabricated 3" diameter steel tube frame as per the original mid-engine layout.

This reproduction is faithful to the meticulous detailing and spirit of the original design.
